# Quantitative Reasoning 28: <br> The Magic of Numbers 

## Homework 30

## Assigned on Wednesday December 10th

Due at 12 noon Monday December 15th
Please submit problem sets at the end of the relevant lecture, or leave in the box labeled QR28 outside the Math Department's main office, on the third floor of the Science Center (Room 325).

## Reading:

Gross-Harris, Chapter 24

## Problems:

Please explain your reasoning and show your work.

1. (a) Find a generator for arithmetic mod 13.
(b) Find a square root of $-1(\bmod 13)$.
(c) Find all other generators for arithmetic mod 13. How many are there? (Does your answer agree with the general formula you learnt today?)
(d) For each non-zero number $a \bmod 13$, find its period (i.e., the smallest number $k>0$ such that $\left.a^{k} \equiv 1(\bmod 13)\right)$.
