

Did you ever wonder what a major in mathematics can help you achieve in your future?

From **Here** to **Where?**

*Conversations with 3 successful math majors who have achieved 3 very different goals in their careers.*

**Alec Resnick** is a Co-Director at Powderhouse Studios, a research and design organization opening a public high school in Somerville, MA.

**Filip Twarowski** is CEO and Founder of Point, an AI startup predicting what customer support reps should say when replying to their customers' questions.

**Teal Guidici** is a Machine Intelligence Scientist at Draper who applies statistical techniques and machine learning algorithms to a wide range of applications — everything from figuring out how to rapidly generate massive amounts of realistic synthetic data, to using neural networks to predict behavior in the stock market.

You will also hear from **Libby A. Doucet**, Assistant Director, MIT Career Counseling and Training.

*Refreshments will be provided!*

Location: Room 2-449

Date: Monday, September 16

Time: 5 -7pm
