Gilbert Strang’s Bibliography

Books

Video Lectures (MIT OpenCourseWare)

1. 18.06 Linear Algebra

2. 18.085 18.086 Computational Science and Engineering

3. Highlights of Calculus
Articles

41. Free boundaries and finite elements in one dimension, with W. Hager, Math. Comp. 29 (1975) 1020-1031.

43. Some recent contributions to plasticity theory, J. Franklin Institute 302 (1977) 429-442.

94. The optimal coefficients in Daubechies wavelets, Physica D 60 (1992) 239-244.

105. Every unit matrix is a LULU, Linear Algebra and Its Applications 265 (1997) 165-172.

120. The mathematics of GPS, SIAM News, (June 1997).

140. Teaching and learning on the Internet, Mathematical Association of America, (2001)

143. IMACS Matrices, Proceedings of 16th IMACS World Congress (2000).

149. Too Much Calculus, SIAM Linear Algebra Activity Group Newsletter (2002); web.mit.edu/18.06.

164. The Four Fundamental Subspaces: 4 Lines

170. Proofs of the Spectral Theorem, with Alan Edelman, web.mit.edu/18.06

179. The main diagonal of a permutation matrix, with M. Lindner, Linear Algebra and Its Applications 439 (2013) 524-537.

181. Functions of difference matrices are Toeplitz plus Hankel, with S. MacNamara, SIAM Review 56 (2014) 525-546.

182. Three steps on an open road, Inverse Problems and Imaging 7 (2013) 961-966.

184. Master equations, with S. MacNamara, to be submitted to SIAM News.

186. Row Rank Equals Column Rank: Four Approaches, Image 53 (Fall 2014), 17.
