MIT PRIMES CIRCLE
Advanced Mathematics for Talented High School Students in the Greater Boston Area

APPLICATIONS DUE NOVEMBER 30, 2021
To apply, visit math.mit.edu/research/highschool/primes/circle or email PrimesCircle@math.mit.edu

What is it?
Menezes Challenge PRIMES Circle is an opportunity for high school students from underrepresented groups in the greater Boston area to learn about mathematics beyond the traditional high school curriculum, to prepare for college, and to work with professors and college students at one of the best math departments in the world: Massachusetts Institute of Technology (MIT).

What will I do?
Circle Scholars work with MIT professors and undergraduate student mentors, meet other talented students from the community, study exciting topics in mathematics like knot theory, game theory, and group theory, write and present an expository paper, and get one step closer to a strong college application.

Can I be a Circle Scholar?
You can be a Circle Scholar if you...
• Are excited about math and want to learn about topics outside of your standard coursework.
• Come from an underrepresented background.
• Live within commuting distance from Boston.
• Are fully vaccinated against COVID-19 (unless a religious belief or medical condition exempts you from the MIT vaccination requirement).

SPRING 2022 (FEBRUARY-MAY) AT MIT CAMPUS*

*PRIMES Circle may take place on Zoom if there are changes to MIT's Covid-19 policy.
