

Problem Set 4

This problem set will not be graded and thus is not due!

Please read and follow the instructions below.

- Textbook problems are denoted by *[Chapter].[Section].[Problem]* and are taken from *James Stewart, Lothar Redlin, Saleem Watson, Precalculus: Mathematics for Calculus, 7th edition.*
- The problems marked "Problems for practice" are the problems that would have been graded if this assignment were due. For additional practice, I have included some additional problems. If you require further practice, then I suggest doing problems from the book that are similar to the problems I have assigned below.

Problems for practice:
