<p>Yujie is an amazing instructor despite it being her first time teaching. She is so considerate of her students, adding summary boxes to the standard worksheets to help us consolidate the new knowledge we've learned and give us an easy reference when studying and also taking the time to walk around during section and answer our questions. She presents the material so clearly, beginning every class with an outline of the lecture, using analogies to help us understand difficult concepts, pointing us back to relevant past worksheets for review, asking us to explain our solution process, and writing things out in different colors for better emphasis. Yujie ranks among the best math teachers I've ever had.</p>
<p>Yujie was a great TF, always happy to help and explain things. She is also clearly enthusiastic about the course material.</p>
<p>Yujie is incredible! She makes the material accessible and interesting, and her summary boxes on the in-class worksheets are a godsend. She's also just the sweetest person. Anyone would be lucky to have her as a TF.</p>
<p>Amazing teacher; always concerned for the success of her students and is interested in extending our learning beyond just the scope of the course.</p>
<p>Yujie was a phenomenal TF who was clearly determined to make sure we understood the content as opposed to just doing well on exams. She was always available via email or office hours and gave me very useful, personalized advice. She made an effort to get to know us as individuals, what we were interested in, and what we were struggling with, to make sure we were getting the most from the class. I recommend her with enthusiasm.</p>
<p>I would never have guessed that this was Yujie's first time instructing a college course. She had great enthusiasm, was incredibly knowledgeable about the material, and cared a lot about her students.</p>
<p>Even though it was Yujie's first year teaching, you wouldn't be able to tell. She is very good at explaining concepts.</p>
<p>Yujie was without a doubt one of the best TFs in math 21b. She was extremely good at explaining both the theory and the application of concepts in class in a logical and easy to follow manner, and she was extremely good at using the board to further elucidate things. Yujie would also take time out of her day to edit summary boxes and other information into the worksheets, and these summary boxes, which had blanks she would have us fill in to reinforce the main takeaways from the day's class, were a huge help when I was reviewing for exams.</p> <p>I'm sure she will continue to excel in whatever she focuses on in the future. Yujie, if you're reading this, thanks for being such an amazing TF. You always told me to come to office hours or send you an email if I had any questions, and I always said I would. I was kinda lying. I never had any questions about the material covered in section because you did such a good job at explaining things. I hope that everything works out in the future for you.</p>
<p>ps sorry for the wall of text</p>
<p>Yujie is great. She looks a bit nervous but teaches with confidence. She makes an effort to meet with students outside of class and can adjust the pace of her lecture to match the students' needs.</p>
<p>Yujie is an excellent instructor. She adds helpful summary boxes to her worksheets to clarify tricky concepts, and she is easy to understand when she teaches. I like her more than my instructor from Math 21a!</p>
<p>Yujie was a good teacher.</p>
<p>She does a relatively good job of breaking down complex concepts and explaining it in a way that is understandable.</p>
<p>Great energy</p>
<p>She's an awesome teacher. She's super dedicated to teaching and making sure that we understand the material. She puts in a lot of time and effort, altering the worksheets to give us summary boxes of important formulas/concepts which is SO helpful when studying for exams. She always answers emails and is super accessible outside of class. She's also really funny and just generally cares a lot for our wellbeing.</p>
<p>Even though this was Yujie's first time teaching, I really think she did a great job. She was very organized, gave clear explanations and was very accessible/approachable inside and outside class. I found it really helpful that she added boxes with key information and summary in the worksheets – helped a lot with my studies. She also encouraged participation, but I wish she created a more collaborative environment (working with different people more often or on the blackboards). Overall, I feel very lucky and grateful for having had her as my TF.</p>
<p>Really good all around! Her worksheets were awesome, she lectured well and explained problems well, and she was super nice and well prepared for every section.</p>
